

(a) star (N=12)

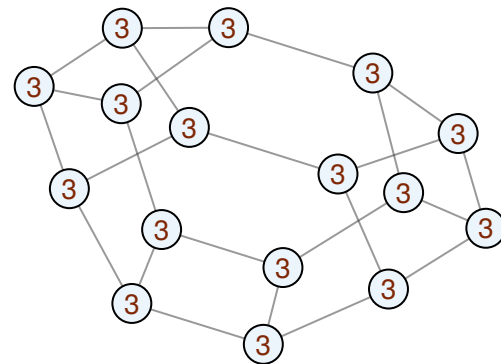

$n1=11, n2=1$

(b) complete bipartite (N=12)

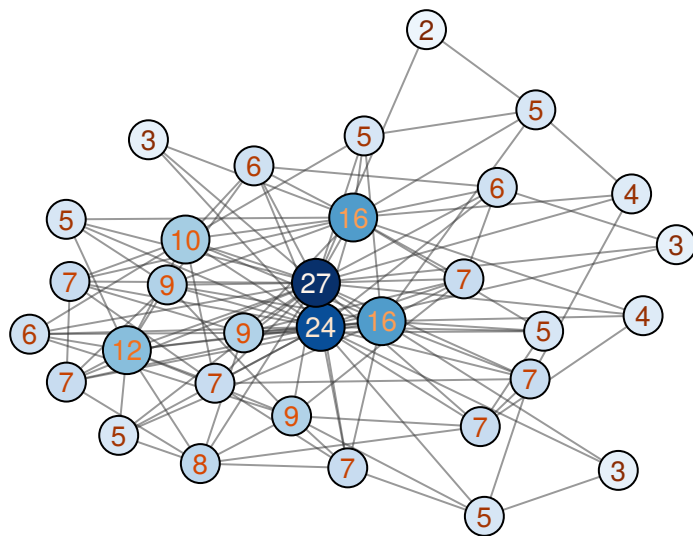

$n1=8, n2=4$

(c) random regular (N=16)

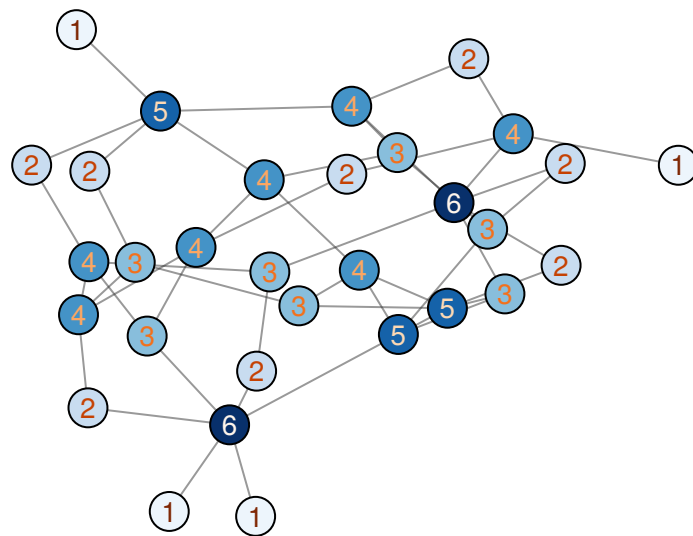

$n=16, k=3, \text{seed}=1$

(d) static scale-free (N=32)

$n=32, m=128, \alpha=2.0, \text{seed}=1$

(e) Erdős-Rényi (N=31)

$n=32, ne=48, \text{seed}=1$
